## **RigMaster Gives Away APU At MATS**

RigMaster closed another successful year in Louisville by holding a draw for a free RigMaster.

Dale Crooks of Post Falls , Idaho is the proud owner of a brand new RigMaster Power auxiliary power unit, which he won in the draw held at 4pm on the last day of the show.

The RigMaster Power unit provides 20,000 BTU's of air conditioning and 12,000 BTU's of heat. RigMaster also offers 6,000 Watts of 120-Volt power for electrical appliances & the truck's block heater, a 60 Amp DC alternator that charges the truck's batteries and is fully independent from the truck's coolant and freon systems.

RigMaster Power eliminates the need to idle the truck, saving thousands of gallons of fuel and needless wear and tear on your engine each year!

Dale's name was randomly drawn from over 4,000 ballots collected during the 3 days at the Mid-America Truck Show in Louisville, KY. Dale's unit will be installed on his 1995 Kenworth T-600. Congratulations Dale and thank you to all those who entered!
